Producent	**NewBeeDrone**

Opis produktu

NewBeeDrone Nitro Nectar NX69 300mAh 1S 80C HV LiPo Battery 4xBatteries with NX69 Connector – High-Discharge 1S FPV Power

Unlock high-discharge **80C performance** for your 1S FPV racing and freestyle drones with the **NewBeeDrone Nitro Nectar NX69 300mAh HV LiPo Battery (4-Pack)**. Paired with the next-generation **NX69 Connector**, this pack delivers a **4.81% higher real-world peak current** than BT2.0 connectors (26.38A vs 25.17A), resulting in harder punch-outs, quicker throttle response, and more consistent power throughout demanding flights.

The connector’s advanced design combines **pure copper (0.85 mm² drone-side)** with **enlarged brass contacts (1.34 mm² battery-side)**, providing a **theoretical conductivity improvement of +69.6%** over BT2.0. This engineering breakthrough is the foundation of the **NX69 name**.

For ease of adoption, NX69 is **fully backward-compatible with PH2.0 systems**. Even when paired with PH2.0 Gold connectors, NX69-equipped batteries maintain about **96.38% of BT2.0’s peak current**, ensuring a smooth and cost-effective upgrade path.

Backed by **real-world testing and theoretical engineering data**, the **Nitro Nectar NX69 300mAh 1S 80C HV LiPo Battery** sets a new benchmark for **1S drone power**—efficient, reliable, and ready to dominate FPV racing and freestyle.

The weight for the NX69 Nitro Nectar Gold 300mAh 1S 80C HV Lipo battery is about 8.3-8.4g

⚡ Why Choose NX69 + Nitro Nectar Gold 300mAh?

- **Peak Real-World Performance**
  Tested at **26.38A peak current output**, NX69 delivers a **4.81% higher performance** compared to BT2.0 connectors (25.17A) under identical conditions. As battery-cell technology continues to advance, this performance advantage is expected to grow even further.

- **Superior Conductivity by Design**
  Built with **pure copper (0.85mm², drone-side)** and an **enlarged brass contact (1.34mm², battery-side)**, NX69 achieves a **theoretical conductivity improvement of +69.6%** over BT2.0. This breakthrough in connector engineering is the inspiration behind the name **“NX69.”**

- **Backwards Compatibility with PH2.0**
  NX69 works seamlessly with existing **PH2.0 charging setups**. Even when paired with PH2.0 Gold connectors, NX69-equipped batteries still deliver approximately **96.38% of BT2.0's peak current**, ensuring a smooth transition without the need for immediate hardware replacement.

● **What's Include:**
4x NewBeeDrone Nitro Nectar NX69 300mAh 1S HV LiPo Battery
1x NX69 Pigtail Power Cable
