Opis produktu

Rama NewBeeDrone SavageBee V1.8 65mm/3inch

Introducing the **NewBeeDrone SavageBee V1.8 Frame (65mm/3inch)**, engineered for durability and performance in micro drone racing and freestyle flying. This lightweight frame is crafted from high-quality materials, ensuring excellent rigidity while minimizing weight, giving you an edge in speed and maneuverability. Designed specifically for 65mm setups, it features ample space for components, making installation easy and efficient. Whether you're a seasoned pilot or just starting, the SavageBee V1.8 Frame is perfect for achieving your aerial goals.

Key Features:

- **Compact Design**: 65mm size optimized for micro racing and freestyle.
- **Lightweight & Durable**: Made from high-quality materials to withstand impacts while keeping weight low.
- **Easy Installation**: Ample space for electronics, simplifying the build process.
- **Versatile Performance**: Suitable for both experienced pilots and beginners.

Easy to Build

Other 3 inch toothpick frames require meticulous, difficult, and tiny soldering. With the NewBeeDrone Hummingbird Pro and BeeBrain BLV3 flight controllers, building this toothpick is easy! The only soldering necessary will be to connect the motors to the ESC. The BeeBrain BLV3 has large soldering pads to accommodate for custom builds.

Specifications

- Carbon Fiber: 2.5mm thickness
- Geometry: X frame
- Diagonal Motor Distance: 115mm
- Motor Mounting Pattern: 9x9 mm square
- Net weight: 8g
