Opis produktu

Antena GepRC TRI-BAND 868MHz/2,4G/5,8G ELRS

Summary

The GEPRC 868MHz/915MHz/2.4GHz tri-band stick antenna features a PCB design with linear polarization for omnidirectional signal reception. It maintains strong connectivity during dynamic flight maneuvers. With excellent cross-polarization suppression, it performs well in high-interference environments, minimizing signal disruption.

Features

1.Triple-band design, 868MHz covers 860-870MHz, 915MHz covers 900-930MHz, 2.4Gz covers 2400-2500MHz

2. Optimized for stronger signal reception at a vertical angle

3. Durable, low-drag oval shape with an injection-molded ABS shell

4. High-quality SMA connector minimizes signal loss

5. Each antenna undergoes testing with a spectrum analyzer to ensure VSWR compliance with standards
