Opis produktu

Highlights

When the Hawk 5 was first unveiled, EMAX revolutionized the drone racing landscape by establishing the optimal specs for fluid racing experience. But what EMAX has done again is redefine the field in aerial drone technology with the revolutionary Hawk Sport.

By utilizing a comparatively lighter canopy, the Hawk Sport features a more aerodynamic profile which enables faster speeds and improved power to weight ratio while still retaining the rigidity and durability to handle any situation. With its slim design, the Hawk Sport also offers a mounting system to allow designers to create their own customizations to further personalize the flight experience.

Featuring a newly engineered power system consisting of the Mini Magnum III power stack paired together with the ECO brushless motor system and AVAN (Uh-Von) Scimitar propellers, maximum power, reliability, and efficiency is achieved offering a superior flight experience over its predecessor.

The Mini Magnum III utilizes a high performance speed controlling system to accept up to 25.2 volts of power, while the ECO motor offers superior performance throughout the throttle band. The flight times and performance of the proven AVAN Scimitar series offers a superior flight experience on the Hawk Sport for beginners and pros alike.

With next-generation performance, the Hawk Sport is here to set a new standard in FPV flight performance.
