Opis produktu

Dron GepRC Cielog35 V2 ELRS - KOMIS

Z racji posiadanego systemu Walksnail Avatar jest to egzemplarz kolekcjonerski :)

GEPRC Cinelog35 is a high-end **Cinewhoop** for flying with **HD camera** indoors or near people. Thanks to **powerful motors** size 2105.5 and **3.5" propellers**, the drone can handle carrying a classic large **GoPro** camera. The Cinelog35 is designed for **6S Lipo** batteries of **1000-1300mAh**.

The frame is very **well crafted** and **well thought out**. There is a **HD camera mount** and FPV camera mount in the front, which is mounted on **rubber softmounts**. This way the camera is not exposed to vibrations from the frame, which helps for better images and **better stabilization**. There is a place for the Lipo battery in the middle section. The frame has **aluminum parts for attaching the lipo tape**, which is not threaded through the controller and does not scratch the components. There is a **hardmounted XT60 connector** in the rear of the frame. So the battery cables go exactly where they should and are out of reach of the propellers.

The Cinelog35 uses the **GEP-F722-45A AIO** controller board, which combines the flight controller with an F722 processor and **ICM42688P** gyro with 45A ESCs with **BlHeli_S** firmware. Propulsion is provided by **SpeedX2 2105.5 2650Kv** motors with **HQProp D-T90mm** propellers. Video transmission is handled by a **Walksnail Avatar V2** digital system.

The drone comes with an ELRS 2.4GHz receiver, but can easily be swapped out for another.

Key Features

- Diagonal motor distance: 142mm
- Arm thickness: 3.5mm
- Flight controller: GEP-F722-45A AIO
- Gyro: ICM42688P
- ESC: 45A BlHeli_S
- VTX: Walksnail Avatar V2
- Camera: Walksnail Avatar Micro V2
- Motors: SpeedX2 2105.5 2650Kv

- Recommended Battery: 1000-1300mAh 6S
- Propeller: HQProp D-T90mm
- Receiver: ELRS 2.4GHz
- Weight: 277g

Package Includes

- 1x Drone
- 1x HQ D-T90mm Propeller Set
- 2x Lipo strap
- 2x Battery Pad
- 1x Screw Set
