Opis produktu

Dron GEPRC DarkStar16 TinyWhoop BEZ WIZJI

Summary

The Darkstar16 is GEPRC’s latest TinyWhoop, designed for flexible, on-the-go flying.

Featuring a 1.6-inch frame and the DJI O4 Air Unit Pro system, it comes equipped with a larger CMOS sensor that delivers sharper, clearer images and improved low-light performance.

The modular VTX, combined with an integrated top cover and four-point damping ball system, effectively filtering out resonances and reducing the jello effect in footage, ensuring stable and clear imaging.

The Darkstar16 offers a high-performance, creative flight experience.

Feature

1. The integrated four-point damping system ensures stable aerial imaging, empowering limitless creativity.
2. Quick-release design lets you detach the VTX module by removing just 6 screws.
3. Equipped with the DJI O4 Air Unit Pro, featuring a larger CMOS for clearer images and better low-light performance.
4. Lightweight molding strikes a balance between durability and performance.
5. The compact 1.6-inch frame offers portability for efficient filming.
6. The fixed XT30 power connector ensures simple on/off operation.
