Opis produktu

Features

1. Use mainstream STM32F405 chip
2. Equipped with the latest 42688-P gyroscope
3. 16M black box storage
4. Integrated LC filter
5. Upgrade type-C USB interface
6. Directly plugged into the DJI Air Unit
7. Simple and reasonable installation method, the shock absorber can make the gyroscope work very stably
8. 9V 2.5A + 5V 3A dual independent BEC

Specifications

- MCU □ STM32F405
- IMU □ ICM42688-P(SPI)
- Air Unit Connection □ Direct plugging into DJI Air Unit
- Black Box □ 16M onboard
- USB Interface □ Type-C
- OSD □ BetaFlight OSD w/ AT7456E chip
- BEC □ 5V@3A, 9V@2.5A dual BEC
- Firmware Target □ GEPRCF405
- Size □ 36.8×36.8mm, hole 30.5×30.5mm □ φ4mm hole becomes φ3mm after using a silicone shock-absorbing circle.
- Input Voltage □ 3-6S LiPo
- UART □ 6
- Power Filter □ Integrated LC filter
- Weight □ 7.7g

Includes

- 1 x Flight Controller
- 1 x DJI Air Unit Adapter Cable
- 1 x Flight Controller Adapter Cable
- 4 x Nylon nuts
- 4 x Silicone grommets
- 2 x sh1.0 4pinsilicone cable
- 1 x Camera connection cable
