Opis produktu

Kontroler lotu AIO HGLRC 12A ELRS VTX

— HGLRC SPECTER F411 12A AIO —

This is an HGLRC SPECTER F411 12A 2-4S ELRS AIO integrated brushless flight controller that integrates a UART5 serial port Express ERS 2.4G receiver. The integrated UART5 serial port receivers will be more stable than the SPI receivers in terms of performance/output.

It solves the problem of few SPI receiver functions, cumbersome operation, and short signal distance. The integrated serial port ELRS receiver also solves the problem of no place to place the receiver during normal setup.

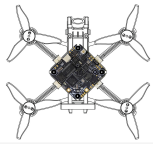

The board has a reserved receiver RTEX seat and a T-shaped antenna, which can easily surround the harsh indoor environment, flight The ELRS receiver has the characteristics of high sensitivity, high refresh rate and low latency, and is loved by many FPV enthusiasts.

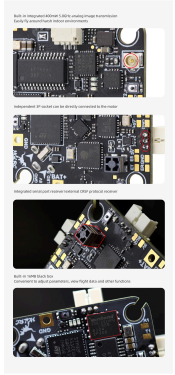

This AIO flight controller can support up to 2-4S batteries, and is also compatible with 75mm 85mm whoop/3-inch lightweight on the market. Toothpick drone,etc. Frame

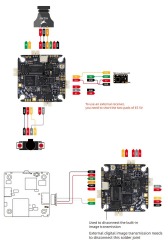

Adapted to Draknight frame

Compatible with 75z lightweight toothpick / whoop and other frames on the market
