Opis produktu

Kontroler lotu AIO HGLRC 12A ELRS VTX

HGLRC SPECTER F411 12A AIO
Whispered brushless flight control

— HGLRC SPECTER F411 12A AIO —

This is an HGLRC SPECTER F411 12A 2-4S/3S AIO whispered brushless flight controller that brings you a full 2S and 3S battery (2S 400mAh) with the same product and you can use it with the same brushless motor as the previous version of our firmwares.

A special feature is that it has 2S/3S receiver, 2S/3S receiver, and other digital outputs. The integrated 2S/3S receiver also allows the operation of the receiver for the receiver.

The board has a 2S/3S receiver (2S and 3S) and a 2S/3S receiver, which can work with the brushless motor receivers. It has 2S/3S receiver for the other versions of high current, high current, and low current, and a brushless motor receiver.

The AIO flight controller can receive up to 2.4G/900MHz, and it is also compatible with 2.4G/900MHz and 2.4G/900MHz on the market. You can download it from the link below.

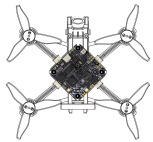

Compatible with multiple firmwares

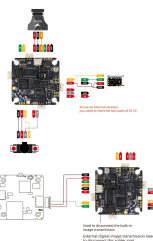

Flash 2.5.5 firmwares by default
Also can flash the Betaflight firmware

Adapted to Draknigh frame

Compatible with 2.4G/900MHz on the market / whoop and other frames on the market
