NewBeeDrone Nitro Nectar Gold 300mAh 1S HV LiPo

Cena brutto	29,99 zł
Cena netto	24,38 zł
Dostępność	Aktualnie niedostępny
Czas wysyłki	1 - 3 dni
Producent	NewBeeDrone

Opis produktu

We are excited to introduce the Nitro Nectar Gold Series HV Lipo Battery Series! They use a different battery packaging technology that provides a better discharging rate for those who like to push the limit! We tested these batteries with our powerhouse 1S craft, the AcroBee BeeBrain BL BNF and they are built to keep up with the demand of raw thrust! After 3 months testing, we are now ready to bring them to the market for whoop pilots across the world!

Lightweight, durable and plenty of power to bring home the Gold!

NOTE: These packs are designed to deliver a major amount of power! With the discharge rate that gives these packs such power, you will feel pack sag much later than normal packs. We suggest setting the low voltage reading to 3.5v and bringing it in to land at 3.3v. You are able to fly below 3.3v but that may result in battery degradation.

You will need a high voltage capable charger, such as our brand new Nectar Injector portable USB powered charger.

Click here to grab some GNB27 pigtails to install on your drone or make charging harnesses.

Specifications:

- Cell count: 1
- Nominal voltage: 3.8V
- Max voltage: 4.35V
- Capacity: 300mah
- Continuous discharge rating: 40C
- Max discharge rating: 80C
- Dimensions: 62mm x 10.5mm x 6.5mm
- Weight: 8.10g (+/-1%)
- Plug: PH 2.0
- Watt hours: 1.14 Wh
