Opis produktu

Rama Geprc cinelog 35 V3 O4 PRO

Summary

The Cinelog35 Series has been upgraded with the V3 frame kit to fully support the O4 Air Unit Pro HD digital transmission system.

The GEP-CL35 V3 frame has been specifically re-molded to fit the O4 Pro module, allowing users to easily access the Type-C port for data transfer and conveniently insert or remove the memory card.

With newly tuned damping balls, featuring improved damping ratios, the camera’s jello effect is effectively minimized for clearer and more stable footage.

Features

1. Compatible with the O4 Air Unit Pro HD digital transmission system.
2. Bottom-mounted camera design connected via tuned damping balls for effective vibration isolation.
3. Updated molds for the O4 Air Unit Pro module, allowing easy Type-C access for data transfer and quick memory card insertion/removal.
4. Designed with a GPS mount compatible with 22mm × 22mm × 8.2mm GPS units.
5. Main carbon plate finished with a matte black coating for a refined and premium appearance.
