## Opis produktu

### Rama NewBeeDrone Cockroach 75mm LiteAF 3.3g

### Light to Fly. Tough to Crash.

Unveil the next evolution of lightweight whoop racing with the **NewBeeDrone Cockroach 75mm Brushless LiteAF Racing Frame** — a high-performance **75mm brushless whoop frame** engineered for pilots who demand **low weight, exceptional durability, and race-ready reliability**. Built on the proven LiteAF philosophy, this frame pushes the limits of speed, control, and crash survivability in the 75mm class.

Featherweight Performance for 75mm Whoop Racing

At the core of the Cockroach 75mm LiteAF lies a **carefully optimized lightweight design**, weighing **around 3.3g**, delivering faster acceleration, sharper cornering, and improved throttle response compared to conventional 75mm frames.

Every structural detail is refined to remove unnecessary mass while maintaining strength, making it an ideal **lightweight FPV racing frame** for competitive whoop pilots.

### Lightweight, Yet Exceptionally Crash-Resistant

Lightweight does not mean fragile. Carrying forward the legendary Cockroach DNA, the 75mm LiteAF is molded from a **high-resilience Polypropylene material**, engineered to flex and recover under impact.

This construction allows the frame to withstand **repeated high-speed crashes and race-level abuse**, making it a **durable whoop frame** trusted for intense practice sessions and competitive racing.

### Race-Focused, Simplified Layout

To maximize racing efficiency, the 75mm LiteAF features a **single top-mounted flight controller layout**, eliminating unnecessary mounting options and excess hardware.

- Reduced overall weight
- Cleaner, faster builds
- Optimized center of gravity for stable and predictable flight

Because in racing, **every gram matters**.

### Optimized for NX69 550mAh Power

For optimal performance, the Cockroach 75mm LiteAF frame is **best paired with NewBeeDrone NX69 550mAh batteries**.

- NX69 connector delivers **low internal resistance** for consistent voltage output
- 550mAh capacity is well-matched to **75mm brushless whoop racing builds**
- Secure, high-retention connection designed for aggressive flying

This combination offers an excellent balance of punch, flight time, and reliability for competitive pilots.

## LiteAF Philosophy, Scaled Up

From LiteAF 65 and now to **LiteAF 75**, the philosophy remains the same:

**Remove the unnecessary. Reinforce what matters. Fly harder. Built to last. Keep racing.**

The **NewBeeDrone Cockroach 75mm Brushless LiteAF Racing Frame** sets a new benchmark for **lightweight, crash-resistant 75mm FPV whoop racing frames**, built for pilots who refuse to compromise.

All NewBeeDrone Cockroach Frames are eligible for unlimited replacements. Find out more information here.

**Specifications**

- Wheelbase: 75mm
- Weight: 3.3g
- Color: Black / White / Jade White / Racing Red
- FC Mounting: 25.5 × 25.5
- Prop Compatibility: 31–40mm

**Included in the Package**

- LiteAF 75mm Frame ×1
- M1.4 × 2 (13pcs)
- M1.2 × 4 (5pcs)

## Produkt posiada dodatkowe opcje:

**Kolor**: Biały , Biały mleczny , Czarny
