Opis produktu

Rama SpeedyBee Mario Fold 8 DC

Tight and Detachable Structure

The drone's structure is designed to be as tight as possible, ensuring that all components are securely attached and can be easily detached for maintenance or upgrades.

Strong and Impressive without Dark Corners

The drone's design is strong and impressive, with no dark corners. This ensures that all components are visible and accessible, making it easier to inspect and maintain.

Flip to Be Compatible

The camera and mounting can be flipped for compatibility with different sensors and accessories.

Synchronize the Best Angle

The drone's camera and mounting can be synchronized to the best angle for optimal performance.

Two Mounting Antenna Methods

The drone's antenna can be mounted in two different ways, providing flexibility in installation.

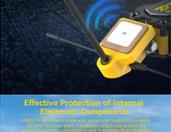

Two Mounting Antenna Methods

The drone's antenna can be mounted in two different ways, providing flexibility in installation.

Clever GPS Installation Location

The drone's GPS is installed in a clever location, ensuring optimal performance and accuracy.

Effective Protection of Sensors

The drone's sensors are protected by a clear, durable cover, ensuring they remain safe and functional.

Enough Space for Two Batteries

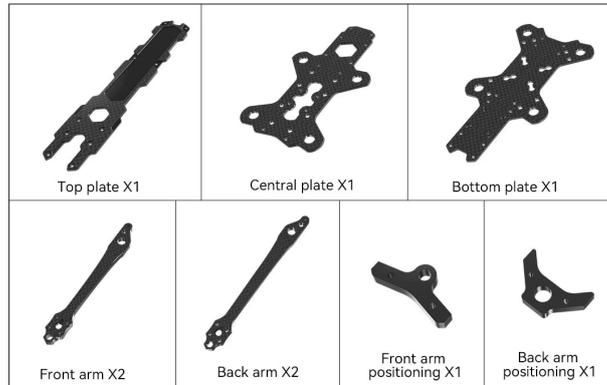

The drone's battery compartment is designed to hold two batteries, providing extended flight time.
