Opis produktu

Silnik GEPRC SPEEDX2 2207E 1960KV

Summary

The SPEEDX2 2207E series features a sleek, all-black glossy design with extensive cutouts for optimal heat dissipation, ensuring durability and impact resistance. Its high responsiveness provides effortless control in every maneuver.

Feature

1. Reduced rotor-stator gap ensures rapid response for seamless freestyle flying.
2. The fresh all-black glossy design with extensive cutouts enhances heat dissipation for better performance.
3. Crafted from 7075 aerospace-grade aluminum with precision CNC machining for a lightweight design.

Specifications

- Model: SPEEDX2 2207E Motor
- KV: 1960
- Max Watt: 1104.7W
- Peak Current: 44.57A
- Interphase Resistance: 69.85mΩ

-
- Propeller: 4-5inch-3blade
 - Magnet: N52H
 - Bearing: NMB/NSK
 - Stator Configuration: 12N14P
 - Dimension: 28*19.6mm
 - Shaft Diameter: 5mm
 - Shaft Length: 13.5mm
 - Mounting Hole Size: 16*16mm
 - Wire Specification: 20AWG/150mm
 - Compatible ESC: 50A/6S
 - Input Voltage: 6S
 - Winding: Single-strand copper winding
 - Color: Black

-
- Weight: 34.5g (including wire)
 - Compatible Models: Suitable for 4inch-5inch racing FPV quads
