Opis produktu

Silnik Lumenier ZIP V2 2807 Cinematic Motor - 1950KV - Cinequads Edition

The **Lumenier ZIP** motor line continues to grow with the addition of the ZIP V2 2807 Motor. With three different KV options to choose from, you'll have a ZIP to match every setup. This new 1950KV is our special **Cinequads Edition**!

The ZIP series by Lumenier is the culmination of years of FPV drone motor manufacturing experience. The ZIP V2 motors feature top-of-the-line components and powerful N52H curved magnets for maximum power. This gives you the best-performing motor for your racing or freestyle drone. Lumenier has always been known for its silky smooth motors, and the ZIP motors are no exception. Each motor is dynamically balanced and tested at the factory to ensure a smooth and perfectly running motor out of the box, resulting in clear and jello-free flight footage.

The Titanium Alloy hollow shaft ZIP motors allow drone pilots to use traditional propellers with nuts. The shafts are made from high-quality and light-weight Titanium Alloy to ensure the best durability possible with threads that will not strip.

The motor features a Titanium Alloy shaft with screw termination for easy maintenance. The ZIP V2 2807 motors come in at 45g.

Cinematic Series

The new Cinematic Motors in the ZIP V2 series are purposefully built for the professional cinematographer in mind. The ZIP V2 Cinematic motors feature an all-black matte finish to seamlessly blend into the background, not drawing any unwanted attention to your drone during shoots. Additionally, the ZIP V2 motors feature premium components for top-of-the-line performance and extra reliability. Lumenier motors are guaranteed to give you the best so you can get the job done right.

Specifications

- **Stator Diameter:** 28mm x 07mm (0.2mm Kawasaki silicon steel)
- **Inner Shaft Diameter:** 4.8mm / Titanium Alloy
- **Bell and Base:** 7075 Anodized Aluminum
- **Base Mounting Pattern:** 19x19mm M3
- **Bearing Size:** Japanese NMB 12X6X4
- **Motor Wire Length:** 180mm / 18AWG
- **Cells (LiPo):** 3-8S (6S most common)
- **Motor Dimension:** 33mm x 19.5mm
- **Motor Connection:** Bare Wire
- **Weight:** 45g (with short wires)
- **Configuration:** 12N14P
- **Magnets:** N52H Curved

- **POPO Compatible:** No
- **Windings:** 12N14P
- **Stator Size:** 2807
- **Prop Shaft:** 5mm
- **KV:** 1950KV

Includes

- 1x Lumenier ZIP V2 2812 Cinematic Motor - Cinequads Editon (1950KV)
- 3x 20cm extra motor wire + heat shrink
- 1x Standard locking Prop Nut
- 4x Mounting Screws (M3x7)
