Silnik T-Motor V1507 4100KV Motor

Cena brutto	**83,00 zł**
Cena netto	**67,48 zł**
Dostępność	**Aktualnie niedostępny**
Czas wysyłki	**1 - 3 dni**
Producent	**T-Motor**

Opis produktu

Silnik T-Motor V1507 4100KV Motor

V1507 FPV Racing Motor is designed for 3-4 inch FPV drones, delivering powerful thrust and smooth performance. Thanks to advanced heat dissipation technology, this motor stays **24% cooler**, ensuring reliable performance during intense flights.

Pair it with **3-inch large pitch propellers** like the T76S for maximum thrust of **up to 200g per motor**. The **12N14P electromagnetic design** optimizes both electromagnetism and heat dissipation, reducing motor temperature by **20°C** during continuous high-speed flights (compared to F1507).

Additionally, the **M2 locking screw** provides easier maintenance and better frame compatibility. With **large bearings and O-ring seals**, this motor offers dual protection, extending its durability and ensuring a smooth, consistent performance.
