Opis produktu

Durable, light and strong 48mm 4-blade props, the default props on HX100. Compatible with [1103 8000KV](#) motor, with the light weight of 3.0g(4pcs), suitable for 85-105mm frame kits, will provide great balance for the drone.

More options on HX100 FPV Quad, please check [65mm 2-Blade Propellers](#) here.

Bullet Point

- With good corrosion resistance and high toughness, not easy to deform, great choice for flying on 3S power.
- Made with high quality BAS material for maximum performance, durability and balance.
- Perfectly suit for HX100 carbon fiber frame and Beta85X frame, compatible with 110X motors like ([1103 motors](#) / [1105 motors](#)) with 2-3S lipo batteries.

Specification

- Material: BAS material
