## Opis produktu

### Śmigła Gemfan Hurricane MAX 51377-3

Type：Gemfan 51377
Material：PC
Pitch：3inch
Prop Disk Diameter ：129.7mm
Center Thickness：6.1mm
Center Hole Inner diameter：5mm
Max Prop Width：14.7mm
Weight：4.5g
Recommended Motor：2207 2100kv

## Product Overview

The Gemfan 51377 is an upgraded tri-blade racing propeller engineered to meet the demands of modern FPV competition. With a 3-inch pitch and a 129.7 mm diameter, it is crafted from durable PC material and weighs 4.5 g, offering a balanced blend of thrust, speed, and impact resistance. The blade geometry has been optimized to pair effectively with new-generation racing motors—especially 2207 2100KV setups—ensuring responsive acceleration and stable power delivery throughout the race. Reinforced structural areas enhance durability, allowing pilots to continue flying even after minor collisions.

## Key Features

- Updated tri-blade design tailored for competitive racing
- Optimized 3-inch pitch for improved throttle stability
- Reinforced weak points to withstand light crashes
- Durable PC construction for consistent and reliable performance
- Smooth power output suitable for high-speed track flying

## Applications

- FPV racing and pre-race training
- High-speed track layouts
- Builds requiring durability and stable response

- Pilots seeking reliable performance under competitive pressure

## Features & Advantages

**Racing-Optimized Pitch**
The 3-inch pitch is tuned to match modern high-efficiency racing motors, delivering improved thrust response and top-end speed.

**Reinforced Structure**
Thickened critical sections help the prop retain shape and functionality after minor impacts, reducing the chance of race-ending failures.

**Stable Power Delivery**
The tri-blade configuration provides predictable handling, allowing precise maneuvering through gates and tight corners.

**Durable PC Material**
Impact-resistant polycarbonate construction ensures long-term reliability, even under the stress of competitive flying.

**Wide Motor Compatibility**
Standard 5 mm hub design fits popular racing motors including 2207 2100KV and similar setups.
