Configure your FC and ESC via Bluetooth!

With SpeedyBee app, turn your phone into an all-in-one PC configuration tool for your drone. Supports ESC, motor, ESC, sensors, fully configurable ESC experience with SpeedyBee app.

ESC upgraded to 60A with heat sink.

The F405 design has been refined, with copper thickness increased from 2 to 3 ounces and enhanced MOSFET specifications. Continuous current with 100% duty cycle of channels, peaking at 30A for 10 seconds. An added aluminum alloy heat sink ensures efficient MOSFET heat dissipation for stable ESC output. It delivers a powerful, compact, and your best high-power BLDC motor.

ICM42688P Gyro and clean power supply.

Featuring MaxLinear's enhanced LDO power chip, the sensor chip delivers clean, interference-free protection by 300% A 100uF filtering beakam capacitor. Stable gyro data from power fluctuations. The ultimate precise flight experience, using the best of the best.

Forget your LiPo checker? Just look at the FCI!

On the side of the flight controller, you will find a 4-level battery capacity indicator. As soon as you connect the battery, you can instantly see the battery level, saving you the hassle of needing to put on glasses to check the battery status.

SD card compatibility issue fixed!

The F405 V4 FC based compatibility returns with certain microSD cards, with a few even occasionally affecting the main OSD display. The improved F405 V4 flight controller, however, addresses these challenges. It reliably supports C4, C6, C10, and higher class or class cards.

SD card recognition up to 64GB. Once you insert the SD card, you can enjoy 1000+ flight. Experience like never before!
