Producent	**NewBeeDrone**

Opis produktu

The Golden combination. Nitro Nectar Gold + Nectar Connector Gold

Unlock the true potential of the most popular battery lead - PH2.0. No need to switch your favorite Nitro Nectar Gold or other PH2.0 batteries to get exceptional performance!

- The original Nectar Connector had folded pins and no coated layers.

- The Nectar Connector Gold Plated Solid Pin features solid brass pins coated with a 24K gold layer. This design ensures optimal power conversion efficiency for an exceptional user experience.

The Nectar Connector Gold can handle a continuous current of 9A at 4V, with the pin temperature stabilizing at 60°C after 5 minutes and reaching a maximum of 120°C at 15A for 10 seconds. This provides stable electrical conductivity, which helps maintain consistent temperatures, reducing power losses caused by heat and preventing the possibility of the board overheating. As a result, **it enables smoother and longer-lasting flights**.
